

```
#define MQ2_PIN A0
#define BUZZER 8
#define LED 13

int threshold = 300;

void setup()
{
    pinMode(BUZZER, OUTPUT);
    pinMode(LED, OUTPUT);

    Serial.begin(9600);
}

void loop()
{
    int sensorValue = analogRead(MQ2_PIN);

    Serial.print("MQ2 Value: ");
    Serial.println(sensorValue);

    if(sensorValue > threshold)
    {
        digitalWrite(LED, HIGH);
        digitalWrite(BUZZER, HIGH);

        Serial.println("WARNING! Gas/Smoke/Alcohol Detected");
    }
    else
    {
        digitalWrite(LED, LOW);
        digitalWrite(BUZZER, LOW);
    }

    delay(500);
}
```
